

LCA & Sustainability Specialist

Deadline:
24-05-2026

We are seeking a structured and analytically strong LCA & Sustainability Specialist to support the development, implementation, and use of our LCA/PCF setup. The ideal candidate will help build and improve our product sustainability data foundation, support our LCA/PCF tool development, and contribute to the broader sustainability agenda across Eltronic Group.

Contact person:
Thomas Honoré

Job area:
Andet

Key Responsibilities:

- Support the development, implementation, and continuous improvement of our LCA/PCF tool
- Build, structure, and document data foundations for LCA and PCF calculations
- Collect, structure, and quality-assure data related to materials, components, processes, and suppliers
- Support the calculation and documentation of product carbon footprints and other relevant environmental impact categories
- Ensure transparency, consistency, and traceability in calculations, assumptions, and data sources
- Apply and work within relevant standards, including ISO 14040, ISO 14044, and ISO 14067
- Collaborate with engineering, procurement, production, quality, and other relevant functions on product sustainability data and analyses
- Support the ESG team with analyses, reporting input, and other sustainability-related tasks, and over time contribute to broader ESG initiatives and strategic priorities

Position type:
Fuldtid

Company:
Eltronic Group A/S

Qualifications:

- Experience with LCA, PCF, or related product sustainability work
- Understanding of LCA methods, data quality, documentation, and calculation principles
- Knowledge of relevant standards and principles within LCA
- Experience working with Excel and preferably other data tools such as Power BI or similar
- Experience with LCA databases or LCA software is an advantage
- Understanding materials, components, BOM structures, and supplier data is an advantage
- Strong collaboration and communication skills, with the ability to translate technical analyses into practical business use

This is a full-time position (37 hours per week) reporting directly to the Head of Group ESG at Eltronic Group. Your primary workplace will be our headquarters in Hedensted.

Company Overview:

We are a Danish-owned global technology pioneer within industrial innovation. Our headquarters is in Hedensted, Denmark, and today we count more than 1,300 dedicated employees across seven companies at 12 offices in 5 countries.

Eltronic Group's subsidiaries operate within three core industries where our solutions can make a meaningful impact: energy transition, industrial automation, and life sciences. Building on years of technical expertise and industry experience, we develop, assemble, and service advanced solutions for global customers. Through innovation, efficiency, and sustainable thinking, we support our customers' progress while contributing to a more sustainable future.

What we offer:

An extremely interesting position with good opportunities for professional and personal development in an inspiring, collaborative, and high-performing work environment. We value responsibility, quality, and innovation highly. We have a good atmosphere in the company, and everyone is always ready to help when needed. We can promise good relationships and accommodating colleagues.

We run Eltronic Group with a typical Nordic management philosophy in a modern and flat organization. We take pride in maintaining an informal organization, where both the level of activity and the mood are high. Additionally, we appreciate mutual respect, trust in individual competencies, and have high confidence in individual judgment. It requires independence and initiative in your daily work, but in return, it gives you the opportunity for a unique position in the market, where you have a high level of trust and freedom, as well as great opportunities for development.

You become part of an innovative and reputable company where the products and solutions are known for their high quality and positive impact on the green energy transition. We offer attractive working conditions, salary based on qualifications, and a versatile daily workday in collaboration with some of the most skilled business developers, engineers, technicians, electricians, and many more.

Application Instructions: Please submit your resume and reach out to Head of Group ESG Thomas

Honoré +45 30178792 with any questions.

Join us in our commitment to building a more sustainable and data-driven future. We look forward to welcoming a motivated professional who can help strengthen our LCA, PCF, and broader sustainability efforts.
